The National Scenic Byways Program

The National Scenic Byways Program, established by Congress in 1991, recognizes historic, scenic and culturally important roads and promotes tourism and economic development in nearby communities. In 1982, the state of Arizona enacted into law ARS 41-512 through ARS 41-518. These laws helped establish Arizona’s Parkways, Historic and Scenic Roads Program, administered by the Arizona Department of Transportation (ADOT). The Parkways, Historic and Scenic Road Advisory Committee (PHSRAC) oversees the designation process and reviews byway request recommendations. Members are comprised of six members representing various counties appointed by the Arizona state governor, and five members from five state agencies. Arizona boasts 25 scenic byways, two of which are All-American Roads; Route 66 and the Red Rock Scenic Byway.

Key points:
- Sedona, running through the Red Rock Scenic Byway, generated over $10 million on local tax dollars to services for residents.
- Grand Canyon National Park had a cumulative benefit to the local economy of over $900 million.
- A recent National Scenic Byway Foundation survey showed that 44 state scenic byways in 24 states are prepared to seek designation as a National Scenic Byway.

Organ Pipe Cactus Parkway offers visitors access to astoundingly beautiful stretches of Arizona’s southern desert.
Map Key:
The numbers following each byway name below match with the respective byway’s numbered location on the map.
